And you?

How would you use Calenco?

A MODERN AND INTUITIVE INTERFACE ANYONE CAN USE

1. Manage tens of thousands of document modules in all the languages

2. Intuitive sorting system for easy tagging and retrieval of all your content and illustrations

3. Image library

4. Manage links between contents

5. Full-text content search

FOCUS ON THE CONTENT AND ITS STRUCTURE. YOU NO LONGER HAVE TO WORRY ABOUT LAYOUT!

1. Automatic calculations

2. Automatic generation of contents pages, tables of illustrations, indexes, headers and footers...

3. Create documents by merely assembling pre-existing blocks

4. Integrated commenting tool

5. Integrated image editor

Upload in-the-field data from your tablet

1 Create **form templates** directly in the Calenco content editor;

2 Send your forms to employees in the field so they can **update maintenance data**, for example, or submit an audit report, with live photos taken on-site;

3 Automatically **generate** a report for your final customer;

4 **Recover** data in a structured format for subsequent analysis.
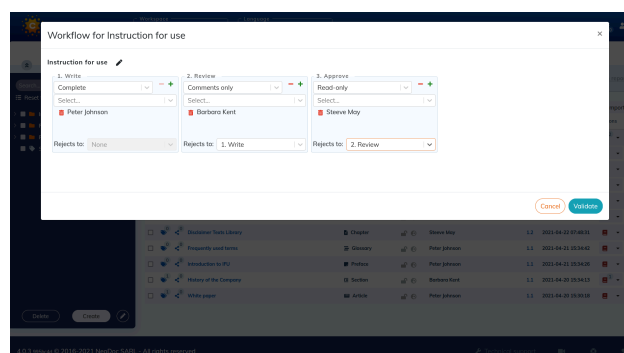

Workflow: structure your teamwork

1 From a re-usable document corpus, define personalized **workflow steps**: writing, editing, approval, translation, etc.

2 Receive email **notifications** at each step;

3 **Monitor** project progress in real time.

And many other innovations to save time and make your content even more reliable

1 Import your existing content from **Word**;

2 Track all **changes** made by your coworkers;

3 **Compare** two versions of the same document;

4 Visualize the extent of **reuse** of contents and illustrations to analyze impacts.
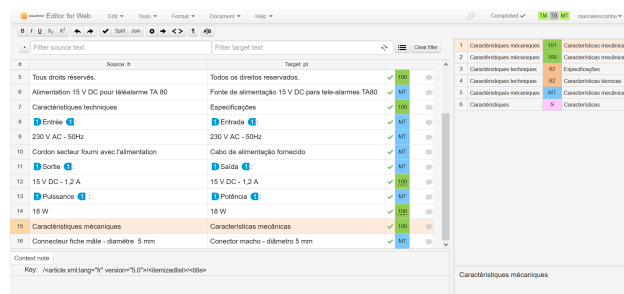

Automate your layout templates using different formats

1 Simply drag and drop to **create** cover pages, headers and footers;

2 Create your **layout templates** for PDF and Web output in just a few clicks;

3 **Define** colours, fonts and logos for all your documents once and for all.

Manage translations, using integrated translation memories

1 The days of messing with email file exchanges are over: the whole drafting and translation process is seamless;

2 Benefit from **pre-translation** by the best machine translation engines on the market;

3 Recover existing **translation memories** and feed them automatically;

4 You only translate new content.

Since 2004, Calenco has been providing solutions for document management

Simple

Flexible

Open-sourced

Multi-cultural

Since 2004, the Calenco team has been going the extra mile to provide ideal document management solutions to those who produce documentation on a daily basis. Including us! Right from the start, with a team from three continents, we leveraged our multi-cultural and inclusive credentials to cover the requirements of customers from all areas of activity. We are also proud to have developed all the main components of our solution in-house.

And finally, of course, we use Calenco ourselves for all our in-house and external communication!
